

Tutorial QGIS : Load Vector Layer

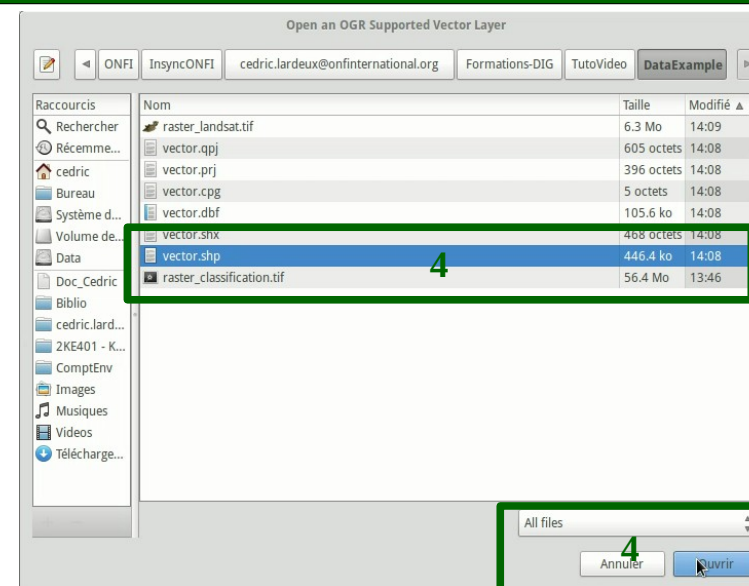

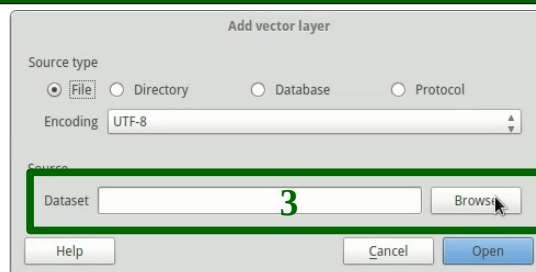

Objective : Load Vector layer in QGIS

Steps	Screenshot
<ol style="list-style-type: none"> 1. Launch Qgis-Desktop 2. Go to menu : Layer → clic Add Vector Layer 	 <p>The screenshot shows the QGIS desktop interface. The 'Layer' menu is open, and the 'Add Vector Layer' option is highlighted with a green box and a red arrow. The menu also shows other options like 'Add Raster Layer...', 'Add PostGIS Layers...', 'Add Spatialite Layer...', 'Add MSSQL Spatial Layer...', 'Add WMS/WMTS Layer...', 'Add WCS Layer...', 'Add WFS Layer...', and 'Add Delimited Text Layer...'. The 'Layers' panel on the left is empty, and the 'Project' window shows a blank map canvas.</p>

Steps

3. Clic on Browse button
4. Select your Vector file and clic Open

Screenshot

5. Again, clic Open
6. Vector is loaded
